

PRATYAY PODDAR

Aspiring Distributed Systems / Backend Engineer • CSE Undergraduate

Kolkata, West Bengal, India | +91 XXXXXXXXXX | pratyay222@gmail.com

[Portfolio](#) | [GitHub](#)

OBJECTIVE

Computer Science undergraduate with a strong foundation in Data Structures and Algorithms and hands-on experience building backend systems in Go and C++. Seeking an internship or entry-level opportunity in backend or distributed systems engineering to apply and grow core problem-solving, systems design, and server-side development skills.

TECHNICAL SKILLS

- Languages: Go (Golang), C++, JavaScript, HTML5, CSS3
- Backend & Data: Go REST APIs, SQLite, Relational Database Management Systems (DBMS)
- Core CS: Data Structures & Algorithms (DSA), Sorting/Searching Algorithms, Recursion & Backtracking, Algorithmic Complexity Analysis
- Tools & Environments: Git, GitHub, Linux, VS Code
- Areas of Interest: Distributed Systems, Backend Architecture, System Design Fundamentals

PROJECTS

Sudoku Solver | C++

- Engineered a backtracking-based algorithmic solver for custom NxN grid configurations, reducing invalid search paths through constraint-based pruning.
- Implemented strict rule-enforcement logic to validate row, column, and sub-grid constraints, minimizing recursive overhead.

github.com/pratyay-poddar/Sudoku_Solver

Unbiased AI Decision Matrix | C++

- Built a rule-based, multi-variable weighted scoring system to evaluate decisions objectively and reduce user cognitive bias.
- Designed modular logic pathways to score multi-criteria inputs through a console-based interface.

github.com/pratyay-poddar/Unbiased-AI-Decision

Login and Registration System | C++

- Developed a local authentication utility with file-handling pipelines to securely read, write, and validate persistent user records.

github.com/pratyay-poddar/Login_and_Registration_System

Personal Portfolio | JavaScript, HTML5, CSS3

- Designed and built a responsive, dark-themed personal portfolio site to showcase backend projects and technical work.

github.com/pratyay-poddar/portfolio

CGPA Calculator | Web

- Created a web-based utility to automate and streamline grade point (CGPA) evaluation logic.
